

Locational knowledge & Place knowledge								
	Nursery (Understanding the World)	Reception (Understanding the World)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can notice and talk about features of my immediate environment. I can identify familiar features such as buildings, roads, shops, trees and playgrounds. I know that there are different places in the world and that they do not all look the same. I can recognise that environments such as a farm, woodland, seaside or jungle are different from the town where I live.	I can talk about the features of my immediate environment and describe what I notice. I can recognise that places and environments can be different from one another. I can compare familiar and contrasting environments, considering features such as buildings, landscape, weather and what lives there. I can recognise that some buildings are old and some are new and talk about their different purposes. I can use simple maps and globes to begin to recognise that places are located in different parts of the world.	I can name and locate the four countries of the United Kingdom. I can name and locate the capital cities of the four countries of the United Kingdom. I can name and locate the seas surrounding the United Kingdom. I can use maps, atlases and globes to identify the United Kingdom and its countries. I can describe some geographical characteristics of the countries and capital cities of the United Kingdom.	I can name and locate the world's seven continents and five oceans. I can use maps, atlases and globes to locate countries, continents and oceans that I have studied. I can locate the United Kingdom and India and identify where they are in relation to continents and oceans. I can describe geographical similarities and differences between London and a contrasting location in India. I can identify the Equator and the North and South Poles and use these to describe the location of hot and cold areas of the world.	I can locate the United Kingdom on maps at different scales. I can name and locate selected counties and major cities of the United Kingdom. I can identify geographical regions of the United Kingdom and describe some of their human and physical characteristics. I can locate and describe key topographical features of the United Kingdom, including hills, mountains, coasts and rivers. I can identify the Equator, Northern and Southern Hemispheres and Arctic and Antarctic Circles. I can use location to begin to explain differences in climate between places.	I can locate South America and identify its position in relation to other continents, oceans and the Equator. I can locate Brazil and other significant countries and cities in South America. I can locate the Amazon rainforest and describe its geographical position and extent. I can identify and describe important human and physical characteristics of the Amazon region. I can identify geographical regions and settlements and explain how their characteristics and land use can change over time. I can use maps to make connections between places, including where people, food and other goods come from.	I can locate significant countries and geographical regions studied within Europe and the wider world. I can identify the position and significance of latitude, longitude, the Equator and the Tropics of Cancer and Capricorn. I can locate significant volcanic and earthquake regions and describe geographical patterns in their distribution. I can locate major world biomes and climate zones. I can identify environmental regions and describe their key physical and human characteristics. I can use information from different maps to draw conclusions about why geographical features and environments are located where they are.	I can confidently locate countries, major cities and significant geographical regions studied throughout KS2. I can use latitude, longitude, hemispheres, the Equator, tropics and polar regions to describe the precise location of places. I can identify and explain geographical patterns and relationships between different locations. I can use maps at different scales to compare the human and physical characteristics of places and regions. I can explain how the characteristics of places can change over time, including through migration, settlement, environmental change and human activity. I can draw and explain conclusions about locations using evidence from maps and other geographical information.
Vocabulary	Place, world, town, building, road, shop, school, house, farm, woodland, seaside, beach, jungle, same, different	Map, globe, world, town, city, countryside, environment, compare, same, different, country, landscape	United Kingdom, England, Scotland, Wales, Northern Ireland, country, capital city, London, Edinburgh, Cardiff, Belfast, sea, locate	Continent, ocean, Europe, Asia, Africa, North America, South America, Antarctica, Australasia, Atlantic Ocean, Pacific Ocean, Indian Ocean, Southern Ocean, Arctic Ocean, Equator, North Pole, South Pole, hot, cold, location, compare	County, city, region, topography, hill, mountain, coast, river, Northern Hemisphere, Southern Hemisphere, Arctic Circle, Antarctic Circle, climate, climate zone	South America, Brazil, Amazon, rainforest, region, settlement, land use, human characteristic, physical characteristic, goods, trade, connection	Latitude, longitude, Equator, Tropic of Cancer, Tropic of Capricorn, biome, climate zone, environmental region, distribution, pattern, volcano, earthquake	Hemisphere, polar region, geographical region, spatial pattern, migration, settlement, environmental change, human activity, relationship, evidence, conclusion

Physical Geography & Human geography								
	Nursery (Understanding the World)	Reception (Understanding the World)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can talk about things I notice in the natural world around me. I can notice simple changes in the natural environment, including changes in weather and seasons. I can talk about familiar human features such as houses, shops, roads and schools. I can talk about familiar physical features such as trees, woodland, beaches and the sea. I can begin to understand that people can care for and affect the environment.	I can identify and describe some human and physical features in familiar and contrasting environments. I can recognise seasonal changes and describe different types of weather. I can compare environments using features such as landscape, weather, plants, animals and buildings. I know that people can have a positive or negative impact on the environment. I can talk about some ways people can care for and protect the environment.	I can identify seasonal and daily weather patterns in the United Kingdom. I can observe and describe different weather conditions. I can recognise patterns in weather across the seasons. I can identify common human and physical features of places in the United Kingdom. I can use geographical vocabulary to describe human and physical features.	I can identify and describe key physical features, including beaches, cliffs, coasts, forests, hills, mountains, seas, oceans, rivers, soil, valleys and vegetation. I can identify and describe key human features, including cities, towns, villages, factories, farms, houses, offices, ports, harbours and shops. I can distinguish between human and physical features. I can compare the human and physical geography of London with a contrasting location in India. I can explain some geographical similarities and differences between the two places.	I can describe and explain the key stages of the water cycle, including evaporation, condensation, precipitation and collection. I can describe the key characteristics of mountains and explain how mountainous landscapes differ from other landscapes. I can describe the key features of a river from source to mouth. I can explain how processes including erosion, transportation and deposition shape rivers. I can identify major climate zones and describe some of their characteristics. I can explain how climate affects the plants and animals found in different environments. I can begin to explain relationships between physical processes, landscapes and living things.	I can describe the climate, vegetation and physical characteristics of the Amazon rainforest. I can explain how climate influences the vegetation and wildlife of a tropical rainforest. I can describe the human characteristics of the Amazon region and explain how people use the rainforest and its resources. I can explain some causes and consequences of deforestation and consider how the rainforest can be protected. I can describe different types of settlement and explain some reasons why settlements develop in particular locations. I can explain how settlements and land use can change over time. I can describe how food and goods are connected to different places through trade. I can begin to explain how choices made in one place can affect people and environments elsewhere.	I can describe the structure of the Earth and explain how this relates to the location of volcanoes and earthquakes. I can explain how volcanoes are formed and describe some of their effects on people and places. I can explain what causes earthquakes and describe some of their effects on people and places. I can identify major biomes and vegetation belts and describe their key characteristics. I can explain relationships between climate, vegetation and the distribution of biomes. I can describe evidence and causes of climate change and explain some of its effects on people and environments. I can explain how human activity can contribute to environmental change. I can consider ways in which people and communities can respond to environmental challenges and improve sustainability.	I can explain how physical and human processes interact to shape places and environments. I can explain how migration can affect the human characteristics of places, including population, settlement and land use. I can explain how economic activity and trade create connections between places. I can describe how natural resources, including energy, food, minerals and water, are distributed and used. I can explain how the use of natural resources can have social and environmental consequences. I can explain how climate change can affect different places and populations in different ways. I can make connections between settlement, land use, economic activity, natural resources and environmental change. I can use geographical evidence to explain different perspectives on geographical issues and suggest reasoned conclusions.
Vocabulary	Weather, season, rain, sun, wind, snow, tree, woodland, beach, sea, building, road, shop, environment, change, care	Human feature, physical feature, environment, season, weather, landscape, countryside, city, farm, river, mountain, forest, protect, recycle	Weather, temperature, season, spring, summer, autumn, winter, rainfall, wind, weather pattern, human feature, physical feature	Human feature, physical feature, city, town, village, factory, farm, house, office, port, harbour, shop, beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation	Water cycle, evaporation, condensation, precipitation, collection, source, mouth, tributary, confluence, river bank, river bed, erosion, transportation, deposition, mountain, mountain range, climate zone	Tropical rainforest, Amazon, climate, vegetation, canopy, emergent layer, understory, forest floor, deforestation, natural resource, settlement, land use, migration, trade, goods, globalisation, sustainability	Earth's crust, mantle, core, tectonic plate, plate boundary, volcano, magma, lava, eruption, earthquake, biome, vegetation belt, tundra, taiga, grassland, savannah, desert, climate change, sustainability	Population, migration, settlement, land use, economic activity, industry, trade link, natural resource, distribution, energy, renewable, non-renewable, food, minerals, water, environmental change, consequence, perspective

Geographical skills and fieldwork								
	Nursery (Understanding the World)	Reception (Understanding the World)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can explore my immediate environment and talk about what I notice. I can ask simple questions about familiar places and the natural world. I can describe where familiar things are using simple positional language. I can recognise familiar places and features in photographs and pictures. I can talk about what I notice when exploring the school and its surroundings.	I can observe and talk about features of my immediate environment. I can use photographs and simple maps to recognise familiar places and features. I can find familiar features on a simple map of the classroom, school or outdoor area. I can use simple positional and directional language to describe where things are. I can make simple comparisons between places based on my observations.	I can use simple compass directions (North, South, East and West) to describe the location of features and routes on a map. I can use locational and directional language, including near, far, left and right. I can use aerial photographs and plan perspectives to recognise landmarks and features. I can devise a simple map of a familiar place. I can use and construct basic symbols and a key on a map. I can make simple observations about the geography of familiar places.	I can use simple fieldwork and observational skills to study my school, its grounds and the surrounding area. I can identify and record human and physical features during fieldwork. I can ask simple geographical questions and collect information to help answer them. I can use photographs, simple maps, sketches and observations to record what I find. I can compare features observed in different locations. I can present simple geographical information using maps, pictures, tables or charts.	I can use maps, atlases and globes to locate places and describe their geographical features. I can use the four points of a compass confidently to describe location and direction. I can use simple four-figure grid references to locate features on a map. I can interpret symbols and keys on maps. I can use fieldwork to observe, measure and record human and physical features in the local area. I can record geographical information using methods including annotated photographs, sketch maps, plans, tables and graphs. I can create maps of locations studied within the United Kingdom.	I can use maps, atlases, globes and digital maps to investigate places and geographical patterns. I can use four-figure grid references confidently to locate features. I can use Ordnance Survey maps and recognise common OS symbols and keys. I can use compass directions, scale, symbols and keys to interpret maps of the local area and other locations studied. I can conduct fieldwork to investigate a geographical question about the local area. I can select appropriate ways to collect and record geographical information, including observations, measurements, photographs, sketch maps and surveys. I can present geographical information using maps, graphs and other appropriate methods.	I can use the eight points of a compass confidently. I can use four-figure grid references confidently and begin to use six-figure grid references to locate features more precisely. I can use maps, atlases, globes, Ordnance Survey maps and digital mapping to investigate places at different scales. I can interpret thematic maps to identify geographical distributions and patterns. I can plan and carry out fieldwork to investigate a geographical question. I can select appropriate methods to collect, measure and record geographical data. I can present and interpret geographical information using maps, graphs, charts and digital tools. I can use geographical evidence to draw conclusions from an enquiry.	I can confidently use the eight points of a compass and four- and six-figure grid references. I can interpret maps at different scales using symbols, keys, contour information and other geographical information. I can use maps, atlases, globes, Ordnance Survey maps, thematic maps and digital mapping to investigate geographical questions. I can use digital mapping and Geographical Information Systems (GIS) to explore and interpret geographical information. I can independently plan and carry out a geographical enquiry, selecting appropriate methods of data collection. I can collect, measure, record and present geographical data using a range of appropriate methods. I can analyse geographical data, identify patterns and relationships and draw evidence-based conclusions. I can evaluate the evidence gathered during fieldwork and suggest ways an enquiry could be improved.
Vocabulary	Place, near, far, next to, behind, in front, photograph, journey, observe, notice	Map, photograph, feature, landmark, route, direction, position, observe, compare, near, far	Map, aerial photograph, bird's-eye view, plan, landmark, route, symbol, key, North, South, East, West, direction, left, right, near, far	Fieldwork, observe, record, human feature, physical feature, locality, sketch, photograph, data, question, compare, table, chart	Atlas, globe, compass, compass point, grid reference, four-figure grid reference, symbol, key, scale, sketch map, plan, measure, record, graph	Ordnance Survey, OS map, OS symbol, four-figure grid reference, scale, digital map, fieldwork, enquiry, survey, observation, measurement, data collection, present	Eight-point compass, North-East, North-West, South-East, South-West, six-figure grid reference, thematic map, distribution, pattern, scale, digital mapping,	Six-figure grid reference, contour, relief, thematic map, digital mapping, Geographical Information System (GIS), geographical enquiry, primary data,

							geographical data, interpret, evidence, conclusion	secondary data, analyse, relationship, evidence, conclusion, evaluate, reliability
