

Design								
	Nursery (Expressive Arts and Design)	Reception (Expressive Arts and Design)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can explore different materials and develop ideas about how I might use them. I can make choices about the materials I use. I can join different materials together and explore a variety of textures when creating.	I can talk about what I want to make and make simple verbal plans. I can choose materials for a purpose. I can use what I have learned through exploring materials to develop my ideas. I can develop and adapt models using a range of different materials.	I can design a product for a clear purpose. I can use pictures, words and simple models to communicate my design ideas. I can design against simple design criteria.	I can use drawings and labels to record and communicate my design ideas. I can develop simple design criteria for a product with a clear purpose. I can design products that meet identified design criteria. I can select materials as part of my design and explain why they are appropriate for the product.	I can investigate and research existing products to inform my own design ideas. I can identify the purpose and intended user of a product. I can develop design criteria based on my research. I can communicate and develop my ideas through discussion, labelled drawings and annotated sketches.	I can use research and design criteria to generate and develop ideas. I can communicate my ideas using annotated sketches, exploded diagrams and prototypes. I can develop and refine my designs in response to what I learn from modelling and prototyping. I can explain how my design is fit for its intended purpose and user.	I can use research to develop a design brief and design criteria. I can generate, communicate and develop ideas using a range of methods, including annotated sketches, pattern pieces, prototypes and computer-aided design (CAD), where appropriate. I can consider the needs and preferences of the intended user when making design decisions. I can explain how the functional and aesthetic qualities of my design meet its intended purpose.	I can use research to develop a detailed design brief and design criteria for a specific user or group. I can generate, develop and communicate innovative, functional and appealing design ideas using a range of appropriate design techniques. I can make informed design decisions, considering purpose, function, appearance and the needs of the intended user. I can justify my design decisions using evidence from research, design criteria and the needs of the intended user.

								I can refine my design ideas before making, explaining how changes will improve the final product.
Vocabulary	Design, idea, plan, choose, choice, material, join, make	Design, plan, idea, choice, material, purpose, model, adapt	Design, product, purpose, user, idea, design criteria, picture, model	Design, product, purpose, user, design criteria, function, material, drawing, label, suitable	Research, investigate, existing product, user, purpose, design criteria, annotated sketch, function, appealing	Design brief, design criteria, annotated sketch, exploded diagram, prototype, user, purpose, function, refine, fit for purpose	Research, design brief, design criteria, design decision, annotated sketch, pattern piece, prototype, computer-aided design (CAD), function, functional, aesthetic, user	Design specification, design brief, design criteria, research, intended user, innovative, functional, appealing, design decision, justify, refine, evidence

Make								
	Nursery (Expressive Arts and Design)	Reception (Expressive Arts and Design)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can explore and use a range of construction, modelling and natural materials.	I can select and use a range of materials to make simple models and forms.	I can select appropriate materials, tools and equipment to make a product.	I can select and use appropriate tools and equipment to cut, shape, join and finish materials.	I can select materials according to their functional properties and appearance and explain my choices.	I can select and use a wider range of tools and equipment accurately and safely.	I can select and use appropriate tools and equipment competently and accurately.	I can independently select and use specialist tools and equipment accurately, safely and efficiently.
	I can join materials together in simple ways. I can use simple tools and techniques with support. I can add materials and decoration to change the appearance of what I make. I can explore and manipulate materials such as dough and clay.	I can join materials using different techniques. I can use simple tools safely and with increasing control. I can manipulate materials such as dough and clay to represent objects with increasing accuracy. I can return to what I have made to add detail, refine it and make improvements.	I can use a range of materials and components, including construction materials and textiles. I can use simple tools to cut, shape, join and finish materials. I can build structures and explore how they can be made stronger, stiffer and more stable. I can follow my design when making a product.	I can select materials and components according to their characteristics. I can measure and mark materials with increasing accuracy. I can use basic stitching techniques to join textiles. I can follow an ordered sequence when making a product. I can make adjustments to my product as I work.	I can select and use appropriate tools and equipment for a particular task. I can measure, mark, cut, shape, join and finish materials with increasing accuracy. I can follow an ordered sequence when making and adapt this where necessary. I can construct and use simple mechanical systems in my products. I can use prototypes to test and improve how my product will work.	I can select materials and components according to their functional properties and aesthetic qualities. I can measure, mark, cut, shape, join and finish materials accurately. I can strengthen, stiffen and reinforce more complex structures. I can construct and use mechanical systems in my products. I can construct and use simple electrical systems in my products. I can make changes during construction	I can select and combine materials and components according to their functional and aesthetic qualities. I can use accurate measuring, marking, cutting, shaping, joining and finishing techniques. I can use computer-aided design (CAD), where appropriate, to support the manufacture of a product or component. I can apply my knowledge of structures, mechanisms or electrical systems, where appropriate,	I can select and combine a wide range of materials and components according to their functional and aesthetic qualities. I can work accurately from measurements, templates, pattern pieces or technical drawings. I can use increasingly complex joining and finishing techniques, including functional and decorative stitching where appropriate. I can apply relevant knowledge of structures, mechanical systems, electrical systems and computer-aided

						when testing shows that improvements are needed.	to create a functional product. I can test components during making and make precise adjustments to improve the finished product.	design when making products. I can work systematically and precisely, adapting my approach when testing identifies a need for improvement. I can produce a high-quality functional product that reflects my design criteria and the needs of the intended user.
Vocabulary	Make, material, join, attach, stick, glue, shape, texture, decorate, tool	Make, material, join, attach, shape, cut, model, tool, refine, improve	Material, component, tool, equipment, cut, shape, join, finish, structure, strong, stiff, stable	Measure, mark, cut, shape, join, finish, material, component, stitch, textile, sequence, adjust	Functional property, aesthetic, measure, mark, accuracy, mechanism, mechanical system, lever, linkage, prototype, component, adapt	Structure, strengthen, stiffen, reinforce, mechanical system, electrical system, circuit, component, switch, motor, accurate, construct	Manufacture, functional quality, aesthetic quality, computer-aided design (CAD), component, accuracy, precision, assemble, test, adjust, mechanism, electrical system	Specialist tool, technical drawing, template, pattern piece, functional stitch, decorative stitch, precision, manufacture, assemble, component, efficient, systematic, quality, finish

Evaluate								
	Nursery (Expressive Arts and Design)	Reception (Expressive Arts and Design)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can talk about what I have made. I can say what I like or dislike about something I have made. I can compare what I have made with what I intended to make. I can talk about simple changes I could make to improve my creation, with adult support.	I can talk about my own and others' creations and say what I like about them. I can reflect on a finished product and compare it with my original idea. I can explain whether my creation works in the way I intended. I can suggest something I might change or do differently next time.	I can explore existing products and talk about what they are for, who might use them and how they work. I can identify materials and features used in existing products. I can evaluate my own product against simple design criteria. I can explain what works well and identify a simple improvement.	I can investigate existing products and identify their purpose, function and intended user. I can explain why particular materials or features have been used. I can evaluate my product against design criteria and explain how well it works. I can suggest specific improvements to my design or finished product.	I can investigate and analyse existing products to identify how effectively they fulfil their purpose. I can evaluate the appearance and function of my product against its original design criteria. I can identify strengths and areas for improvement in my design and product. I can justify changes I would make to improve my product.	I can evaluate designs and prototypes throughout the design and making process. I can test how effectively a product functions and use the results to make improvements. I can evaluate my finished product against its design criteria, purpose and the needs of the intended user. I can explain and justify changes made during the design and making process.	I can critically investigate and compare existing products, considering their function, materials, manufacture and fitness for purpose. I can evaluate my ideas, prototypes and products throughout the design and making process. I can gather and consider feedback from others, including the intended user, to improve my product. I can evaluate the functional and aesthetic qualities of my finished product against my design criteria. I can use evidence from testing and feedback to identify	I can critically analyse existing products and explain how effectively they meet the needs of their intended users. I can evaluate design decisions throughout the design and making process and make evidence-based refinements. I can test my product systematically against its design criteria and design specification. I can use feedback from intended users to evaluate the success of my product. I can critically evaluate the function, appearance, quality and fitness for purpose of my finished product. I can justify improvements using evidence from testing,

							and justify improvements.	feedback and evaluation.
Vocabulary	Evaluate, like, dislike, same, different, match, change, improve	Evaluate, reflect, compare, idea, product, works, change, improve	Evaluate, product, purpose, user, function, design criteria, feature, improve	Evaluate, purpose, function, intended user, material, design criteria, improvement, effective	Analyse, evaluate, appearance, function, design criteria, strength, improvement, justify, fit for purpose	Evaluate, prototype, test, function, design criteria, intended user, feedback, modify, justify	Critically evaluate, manufacture, functional quality, aesthetic quality, fitness for purpose, testing, feedback, evidence, intended user, refine	Critical analysis, design specification, systematic testing, user feedback, function, appearance, quality, fitness for purpose, evidence, refinement, justify

Cooking and Nutrition								
	Nursery (Expressive Arts and Design)	Reception (Expressive Arts and Design)	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Substantive knowledge & Skills	I can take part in simple food preparation and cooking activities. I can explore food using my senses and describe what I notice. I can begin to recognise where some familiar foods come from. I can follow simple instructions about hygiene and safety when preparing food.	I can use a range of simple equipment when preparing food, with appropriate support. I can follow a simple recipe with adult support. I can talk about where some familiar foods come from, including plants and animals. I can make simple choices about ingredients and talk about their taste, texture and appearance. I can follow instructions to prepare food safely and hygienically.	I can understand that food and drink are needed for a healthy and active life. I can identify different foods and begin to understand the importance of eating a varied and balanced diet. I can understand that food comes from plants or animals and identify the source of some familiar foods. I can select and use ingredients to prepare a simple dish. I can use simple food preparation techniques, including peeling, cutting, slicing, grating and mixing, with	I can explain why a varied and balanced diet is important. I can select ingredients for a dish and explain some of my choices. I can identify how a wider range of foods are grown, reared or caught. I can follow a simple recipe in the correct sequence. I can use a range of preparation techniques, including peeling, cutting, slicing, grating, mixing, spreading and kneading. I can use equipment safely and hygienically with increasing independence.	I can understand that different foods provide different nutrients and contribute to a balanced diet. I can select ingredients and cooking techniques to prepare a balanced dish. I can measure ingredients accurately using appropriate units. I can understand that food is grown, reared and caught and may be processed before we eat it. I can understand seasonality and identify when some foods are available. I can follow a recipe with increasing independence and use a range of preparation and	I can explain how different food groups and nutrients contribute to a healthy, balanced diet. I can select and combine ingredients based on their properties, nutritional value and intended outcome. I can follow and adapt a recipe, measuring ingredients accurately. I can use a range of preparation and cooking techniques safely and accurately. I can explain seasonality and how this can influence the ingredients available to us. I can explain some ways in which food	I can use my understanding of nutrition to plan and prepare a balanced dish for an intended user. I can independently follow and adapt recipes, selecting appropriate ingredients, equipment and techniques. I can measure ingredients accurately and use proportion to scale quantities in a recipe. I can use increasingly complex preparation and cooking techniques safely and competently. I can explain how food may be grown, reared, caught, processed and transported before	I can apply my knowledge of nutrition to independently plan and prepare a dish for a particular purpose and intended user. I can select ingredients, equipment and cooking techniques and justify my choices. I can independently follow, adapt and scale recipes accurately. I can use a range of preparation and cooking techniques safely, accurately and efficiently. I can explain how ingredients are grown, reared, caught, processed, transported and sold. I can evaluate food choices by considering nutrition, seasonality, provenance, environmental impact and ethical considerations.

			appropriate supervision. I can follow basic food hygiene and safety procedures.		cooking techniques safely.	production and farming can affect the environment.	reaching the consumer. I can consider the environmental and social impact of food choices, including seasonality, food miles and Fairtrade.	I can evaluate the finished dish against its intended purpose and suggest improvements.
Vocabulary	Food, ingredient, fruit, vegetable, taste, smell, touch, soft, hard, sweet, sour, mix, cut, clean, safe	Ingredient, recipe, equipment, utensil, prepare, mix, cut, peel, taste, texture, healthy, hygiene, plant, animal	Balanced diet, healthy, varied, ingredient, prepare, peel, slice, grate, mix, fruit, vegetable, plant, animal, hygiene, safety	Nutrition, balanced diet, ingredient, recipe, sequence, peel, slice, grate, spread, knead, grown, reared, caught, hygienic	Nutrient, nutrition, carbohydrate, protein, fat, vitamins, balanced diet, measure, weigh, seasonality, seasonal, grown, reared, caught, processed	Nutritional value, food group, nutrient, seasonality, ingredient, recipe, adapt, measure, cooking technique, food production, farming, environmental impact	Proportion, scale, quantity, provenance, food miles, consumer, Fairtrade, ethical, environmental impact, processed, transported, seasonality, competent	Provenance, nutrition, intended user, proportion, scale, adapt, justify, efficient, seasonality, environmental impact, ethical consideration, evaluate, refinement
